# I. Korean Economy Briefs

Source : The World Bank

# I. Korea's ICT Status

- UN, E-Government development index : 0.9283 (**Rank No. 1**) [2010y, 2012y]
- ITU, ICT Development Index(IDI) : 8.56 (**Rank No. 1**) [2011y, 2012y]
- OECD , Rate of Wireless broadband : 103.04% (OECD average : 62.7%)

Korea is world's first country to see high speed Internet access pass 100% penetration

By [Jon Russell](#), Sunday, 22 Jul '12, 10:03pm

# I. Korea's ICT Status

## 4G Mobile

LTE Deployment

## ICT Convergence

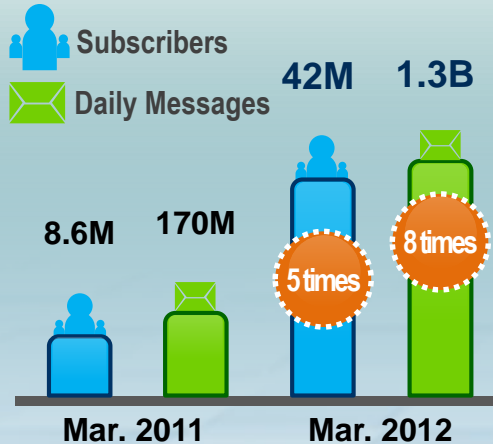

5 million IPTV Subscribers

## Access Network

100Mbps Broadband Connection

## Kakao Talk

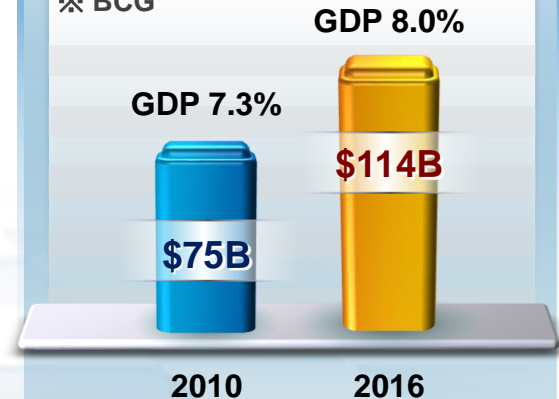

## Domestic App. Market

※ KOCCA

## Internet Economy

※ BCG

## II. Key Success Factors

“We were behind in industrialization,  
but be a leader in information era”

(Catch Phrase of MIC)

### Korea's Five Policies

- ① A dedicated ministry for ICT in the government
- ② Laws to make competitive environments
- ③ Stable financial resources
- ④ Participation of private professionals at government affiliated organizations
- ⑤ Communication with the public

## II. Key Success Factors

### Incentive system to boost competition

- ① Adopting competitive market for telecommunication
- ② Deregulation of 'high-speed internet service'

### Push-pull strategy

- ① Launched pilot projects for e-gov., e-edu., e-health
- ② Low flat rate pricing
- ③ Promotion of PC purchase for households
- ④ Internet access for seniors, soldiers, disabled, prisoners

## II. Key Success Factors

### **New Internet industries and jobs are created**

- World-class online game ventures, portals and SW companies

### **The economic transparency is increased**

- Financial sector was computerized with the real name system

### **Productivity gains through Internet**

- The Internet banking : \$33 billions/day

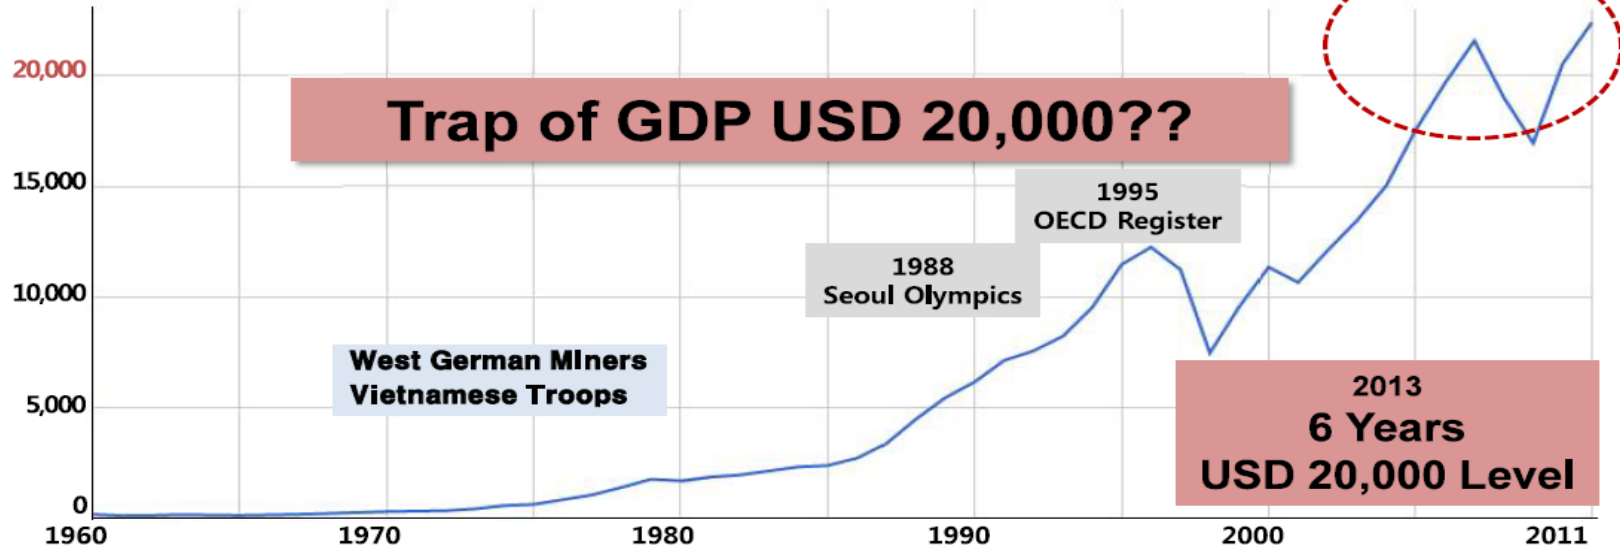

\*CD/ATM(42.4%) > **Internet Banking(32.5%)** > Telephone Banking(13.7%) > Off-line Banking(11.6%)

- Online Shopping : \$25billions/year (8.4%)

- M-commerce : \$ 3millions (2009) -> \$600 millions (2012)

# III. New Challenges

# New Challenges

## **Network and H/W oriented Industry**

- High-speed communication network
- Mobile radio communication network (3G, LTE)
- Smart Devices (Phone, Tablet)
- Semiconductor

## **Side-effects of Internet**

- Hacking and DDoS attacks
- Personal information protection
- Infodemic etc.

# III. New Challenges

## ICT Vision 2020

1980s

1990s

2000s

2010s

2020s

Informatization Era

Mobile Communications Revolution

Internet Revolution

Smart Era

Hyper-Connection Era

- TDX / Wired Communications
- National Backbone Networks

- CDMA Technology
- Mobile Communications Development

- Widespread Broadband

- Spread of Smart Devices

- Digital Ecosystem
- Promoting Creative Knowledge Industries
- Global Co-prosperity

# III. New Challenges

## UBcN

- **1Gbps Pilot Service in 2012**
  - Distribution to 20% of households by 2015
- **Securing 10Gbps - Class Core Tech. by 2015**

100Mbps

↓ X 10

1Gbps

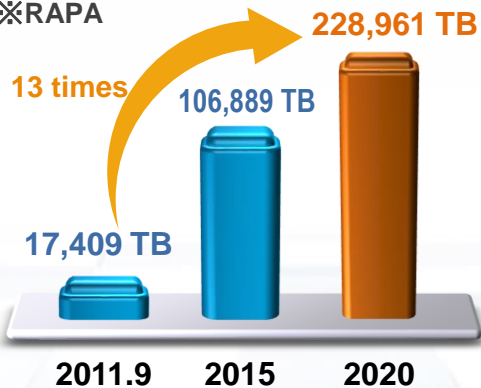

## 4G Mobile

- **Nationwide LTE service**
- **Free Up Additional Spectrum**
  - Max. 650MHz by 2020

### Mobile Traffic

※RAPA

## Digital Broadcasting

- **Digital Switchover**
  - Analog broadcasting terminates on Dec. 31, 2012
- **Promoting Convergence Services i.e. Smart TV**

# III. New Challenges

**Thank you**
